**Re: Sauget Sites Area I - May 31, 2000 Unilateral Administrative Order (UAO)  
Sediment / Soils Removal Action  
# 17 - October 2002 Monthly Report**

Dear Mr. Turner and Mr. Martin,

Enclosed is the October 2002 Monthly Report for the Sauget Sites Area I May 31, 2000 Unilateral Administrative Order ("UAO") Sediment Removal Action. This submittal is in fulfillment of the monthly reporting requirements of the UAO, Section V, and paragraph 3.4. Reporting.

Sincerely,

Alan G. Faust  
Project Coordinator  
Solutia Inc.

## Sauget Sites Area I - Sauget, Illinois

### **May 31, 2000 UAO – Dead Creek Sediment Removal Action**

#### **Monthly Report**

**Date of Report:** October 7, 2002

**Period Covered:** September 1, 2002 – September 30, 2002

**Next Report Period:** October 1, 2002 – October 31, 2002

---

#### **Background**

A Unilateral Administrative Order (“UAO”) was issued to Solutia by the U. S. EPA on May 31, 2000, requiring construction of an on-site containment cell, removal of affected creek bed sediments and soils and flood plain soils from specific sections of Dead Creek, and placement of the affected sediments and soils in the newly constructed on-site cell. A Time Critical Removal Action Work Plan (“TCRAWP”) was initially submitted to the Agencies on June 30, 2000 for review and approval. Agreements sufficient to proceed with issuance of a request for bids for the containment cell construction were reached in December 2000. Bids were received in late January and evaluated in February 2001.

Fieldwork began on the sediment de-watering phase of the project in November 2000. Installation of the required facilities (piping, pumps, basins, etc.) to de-water the sediments while the containment cell was being constructed was completed and started up in February 2001. Operation of these facilities will continue until all sediments are placed into the containment cell.

Subject to the inclusion of all comments and agreed upon revisions; approval of the containment cell design by U. S. EPA was received on March 5, 2001. A contract for construction of the containment cell was awarded on March 8, 2001 to LMS Environmental Contracting, Inc. (“LMS”). Placement of fill for the Containment Cell berms began on April 23, 2001. A March 30, 2001 revised draft containment cell design was approved by the Agencies in a May 10, 2001 letter. Construction was completed on the Containment Cell on September 13, 2001. A draft Containment Cell Certification Report was submitted for the Agencies’ review and approval upon construction completion. The Containment Cell was approved on September 24, 2001 by USEPA and IEPA for receipt of sediment. Placement of sediments into the cell began on September 26, 2001.

An Amendment to the UAO was received on October 29, 2001. The Amendment modified the project scope of the UAO – adding Creek Sector F sediments removal and placement into the Containment Cell. On August 20, 2001, Solutia requested a change in

the Post Removal Confirmation Sampling and analytical protocols. In a November 30, 2001 communication, the Agency responded with revised sampling and analytical protocols.

### **Agency Actions / Communications**

- Revision 01 Draft Groundwater Monitoring Plan - submitted to the Agencies on August 3, 2001 – remained under review.
- The Operations and Maintenance Report - submitted for Agencies' review and approval on August 28, 2001- remained under review. Portions of the Plan applicable to the placement of sediments have already been approved.
- Responses to comments received from USEPA on the Mitigation Plan for Dead Creek – submitted to the Agencies on August 1, 2001 – remained under review.

### **Work Performed during the reporting period**

- Performed weekly inspection of the site.
- Maintained operation of the 50-gpm stormwater treatment system.
- Inspected and maintained the 6oz. Geotextile/6 mil scrim reinforced poly cover over the containment cell.
- Maintained stormwater and leachate collection controls around the containment cell.
- Monitored support area facilities.
- Collected groundwater samples for analyses from ten monitoring wells installed in accordance with the Draft Groundwater Monitoring Plan (Revision 01). These samples were sent to STL Laboratories for analysis of the parameters identified in the draft plan.

### **Data Submittal**

Validated groundwater monitoring data from June 20, 21, & 25 is attached to this report.

### **Work scheduled for next reporting period**

- Conduct routine inspection of the containment cell.
- Continue operation of the 50-gpm stormwater treatment system.
- Perform necessary operation and maintenance on the containment cell and temporary treatment system.

---

## **PROJECT COMPLETION**

Mobilization	100 %
Berm Construction	100 %
Liner Installation	100 %
Sediment Removal Preparation	100 %
Sediment Excavation (Site M)	100 %
Sediment Excavation (Original Scope of Work)	100 %
Sediment Excavation (Sector F)	100 %
Temporary Cover installation	100 %
Demobilization - Phase I	100 %
Final Cover Installation	0 %
Demobilization - Phase II	0 %
Final Report Preparation	0 %

### **Problems and Solutions**

In discussion with officials from the Village of Cahokia, standing water in separate segments of Dead Creek emerged as a source of concern, given the current public health warnings about the West Nile Virus. The water is stagnant because the creek bottom is significantly lower than culvert inverts.

Because of this concern, Solutia agreed to install temporary pumps to pump the water downstream. This work was completed during the reporting period. A permanent pumping system could be installed during the next reporting period. The system will consist of six pumps permanently mounted in the creek. The pumps will be fitted with level control switches and will pump water downstream through the existing culverts when the water level is below the culvert inverts.

### **Submittal Schedule Status**

See attached UAO schedule

### **Issues under review**

None

### **Comments**

None

## **May 31 Sauget Area I UAO Sediment Removal Action**

### **SCHEDULE**

<b>Deliverable</b>	<b>Description</b>	<b>Due Date</b>
Issuance Date	Date UAO signed by Munro	31-May-00
Effective Date	10 business day after issuance	14-Jun-00
Notice of Intent to Comply	3 business days after effective date	19-Jun-00
Designation of Contractor and Project Coordinator	5 business days after effective date	21-Jun-00
Access	14 calendar days after effective date	28-Jun-00
Time Critical Removal Action Work Plan Submittal	15 business days after effective date	7-Jul-00
EPA Approval of TCRA W/P		May 10, 2001
Monthly Reports	Begin 30 calendar days after approval of TCRA W/P until completion	June 10, 2001
Final Report	60 Calendar days after completion of sediments and soils removal	
Mitigation Plan	60 Calendar days after completion of sediments and soils removal	May 22, 2002
